Several large shipments of the moss have been sent to Germany during the past two months.

SAFE CRACKER IDENTIFIED BY HIS FINGER PRINTS

The finger print system was again responsible for the capture of a safe cracker who on Sunday night broke into the Buick garage at Reno and dynamited the safe in the office of the concern, says the Carson News. The robbers gained admittance by breaking one of the back windows and officers from Carson City were called to the assistance of the Reno police for the purpose of endeavoring to obtain the finger prints from the broken panes. They were successful in the development of a good print, and a suspect the police had in mind was conclusively that the prisoner, whose name is Dick Brown, confessed to the crime.

(By Associated Press.)

LONDON, Nov. 2.—Premier Asquith's speech in the house of commons on the policy and plans of Great Britain, concerning which he did not disclose much more than was known, monopolized the attention of Europe and the fighting, although it has been severe on some of the fronts, is receiving little thought in comparison.

BOUNTY LAW WORKS HARDSHIP

C. A. Gay of Lucky Boy claims that the present state bounty law works an injustice to the trapper and should be amended. To encourage trapping, he says, the state should give the trappers all the encouragement possible and pass a law that will give the trapper all he can get out of his work, which has many hardships connected with it. He suggests that the state law be amended to allow county clerks to use a punch to show the bounty has been paid on the animal, instead of detaching the scalp as at present, as buyers hold that the hide is depreciated in value and reduce the price by a sum almost equivalent to the bounty.—Carson Appeal.

ENTHUSIASM OVER THE PRICE OF SILVER

BELIEF EXPRESSED THAT OUTPUT OF TONOPAH MINES WILL BE AUGMENTED

When the price of silver—50 cents an ounce—was announced this morning there was great rejoicing in Tonopah. This district does not depend entirely upon the silver content of its ores, for the gold would almost alone pay the cost of extraction in some instances, but every eighth of a cent added to the price of the white metal means just that much more for dividends or increased activities and appreciates the value of the stocks as well.

It is rumored that a certain mill in Tonopah will have ten stamps added to its equipment now that the half dollar point is reached, the other departments having been brought up to a scale of efficiency that the additional ten stamps would round out the equipment. There is also a rumor that a mill in the district, which has been idle for some time, will soon be overhauled and put to work on custom ore now that the price of the white metal justifies the additional extraction of ore.

NEWSPAPERS TIRE OF CENSORS

(By Associated Press.)

BUDAPEST, Hungary, Nov. 4.—A systematic campaign of opposition to the censor is being waged by the newspapers of Austria and Hungary. A memorandum to the prime minister, signed by publishers and editors, points out that the newspapers existed during the first year of the war under a milder censorship and succeeded in serving the country worthily and patriotically. "Is it not then unjust," they ask, "that an increasing number of restrictions should be applied daily? The newspapers are tired of being allowed to speak only of city authorities and fraudulent army contractors, and seek the restoration of the small freedom which they enjoyed in pre-war times." Since the war, it is stated, thirty-seven Hungarian newspapers published by Czechs, Slovaks, Slavs, and Rumanians have been suppressed.
